This game is HELLA FUN! It's just a lot of shooting and laughing with friends! I highly recommend it! Perfect for game nights and just senseless fun with friends!!!. I bought this game about 3 hours ago, and currently have 2.8 hours playtime. It's so addictive. I'm loving it, the community is awesome and I highly suggest anyone who likes top down shooters.. grab it now!. The most PvP fun I've had since Fat Princess. This game is INCREDIBLE and the devs continue to innovate at every turn. I'm so happy I found this game!

Squids From Space takes a simple game of capture the flag and turns it into clutch demolishing humans with a mech and laughing maniacally while driving a jeep over pesky squids. There are other game modes besides capture the flag, like king of the hill and capture and hold, and each mode can be one valuable player away from winning the game for your team. If you have a crew of friends you usually play PvP games with, buy Squids From Space for the whole squad and enjoy a few hours of extreme rage and\/or the sweet taste of victory.. Great time killer and fun gameplay.. This game deservers more attention. Its extremely well rounded for being in Early Access. I haven't had so much fun and laughed so hard in a long time. Highly recommend this game and I look forward to seeing more content from these guys!

10/10 This game is amazing. Super fun and easy to learn.. My friends and I found this game to be surprisingly fun. The game is smooth, looks good and plays great.. failed game. Pretty fantastic! The initial map is a real playground with all the tools available. Brings me back to my dev days. Thanks Fun Bits!. this game is amazingly fun! I would suggest making sure you play completly thru the tutorial or you will miss the Squi side of the tutorial. i highly recomend this game if you want something to play with friends or just to kill some time!. I absolutely loved this game I thought it was funny how the game is revolved around Humans Vs. [Alien Species Here] and the aliens are squids, I love squids and I also love this game, although some stuff seem unfinished and weird, its still ok, not everything needs to be implemented completely, there was something I was confused about but I instantly got used to it.. It's games like this that give me the most satisfaction in indie games!

Fun Bits knocked it out of the park in gameplay

AI pathing is still a little rough (had to blow up a jeep to get them to go properly) but that is something that I'm sure will be hammered out in release. Please do support this game!. Imagine Fat Princess but with Squids and Soldiers and bob's your uncle and david's your dad. This game is a solid lovely game with friendly active devs and a anti-toxic playerbase. Still needs work (performance and tutorial mainly) but the game is lovely.. this game is amazingly fun! I would suggest making sure you play completly thru the tutorial or you will miss the Squi side of the tutorial. i highly recomend this game if you want something to play with friends or just to kill some time!
